## DESCRIPTION

This beautiful, elegant building is situated in the grounds of the University College Dublin and remains one of our finest building projects. The design concept by Robin Lee Architecture perfectly complements the surrounding environment of the UCD, while projecting a unique stunning design that contains elements of Chinese architecture and culture. The building consists of the construction of a free standing 3 storey building which includes teaching spaces, a library exhibition space, restaurant facility and ancillary areas such as office space for fulltime, part time and visiting lectures. The contract also included extensive siteworks within the site boundary. The exterior has an immediate aesthetic impact on the visitor. The interior is equally impressive with its unique design creating a sense of open space that also manages to feel intimate and does not alienate staff from one another. It's an outstanding building and Glenman are very proud to have been a part of this project.
